

Brand-Rex Datacentre Cabinets and Racks
High Density Distribution Equipment Rack

- Reduced installation time
- Network installations made easy
- Maximising useable space and minimise footprint
- Totally open constructions for ease of cross-patching
- Flexible configuration
- Enhanced thermal management

PRODUCT DESCRIPTION

The Distribution Equipment Rack (DER) provides increased accessibility and has a flexible modular design that can be configured to suit small, corporate and internet datacentres. The DER set can be configured as an open frame to manage the cabling at the distributors or as a closed cabinet to safely secure servers and storage equipment. The designs are modular and flexible.

The logic of the modular, flexible systems are the key benefits of this best in class cable and equipment management system range. Features also include vented and glass door options, side panels and top panels with cable access. These Cabinets have an unparalleled level of flexibility, providing the end user with the right cabinet for the right application.

PRODUCT CHARACTERISTICS

Applications

- Small, Corporate and Internet Datacentres

Installation

- Suitable for use with approved Brand-Rex Copper and Fibre Patch cords, panels and cable management products

MECHANICAL SPECIFICATIONS:

Dimensions / Weight

- 2000mm x 875/1000mm x 600/800mm (H x D x W)
- 150kg (including Doors, Side Panels and Twist and Locks)
