

LAMBDA SENSOR CABLE

Lambda Sensor

PRODUCT DESCRIPTION:

The rapid uptake of catalytic converters has resulted in a dramatic reduction in exhaust emissions. Brand-Rex conforms to environmental protocols and have developed a high performance sensor cable which meets the stringent demands of extreme high temperatures to control evaporative emissions. Combining high resistance to solvents, oil and fuels this cable has excellent physical properties, performing over a wide range of operating temperatures.

PRODUCT CHARACTERISTICS:

Conductor:	Flexible stranded plated copper wires
Insulator:	PTFE
Colours:	Black, white, grey, red, yellow

PRODUCT PERFORMANCE:

Conductor resistance:
Max conductor resistance and type of wire defined by customer specification

Operating temperature range: -50°C to +280°C
(2000 hours ISO 6722)

Insulation strip force:
Manufactured to individual customer requirements
